Education

Benha University

M.Sc. in Artificial Intelligence

Benha, Egypt

Oct 2025

Benha University

B.Sc. in Computer Science

Benha, Egypt

Sep 2021 – Jun 2025

- GPA: 3.52/4.0
- Major: Artificial Intelligence
- Relevant Coursework: Machine Learning, Deep Learning, Data Science, NLP, Computer Vision
- **Thesis:** Machine-Generated Text Detection with Exam Grading System

Experience

Data Scientist *Diseo*

Apr 2025 – Jun 2025

- Researched and evaluated blockchain platforms (Hyperledger Fabric, Solana, Sui, Worldcoin, Injective, Onyxcoin, EOS) for integration into a decentralized social media ecosystem.
- Conducted comparative analysis on scalability, governance, revenue, identity systems, and EVM compatibility.
- Authored a comprehensive report recommending optimal blockchain solutions for multi-role governance and biometric identity verification.
- Advised on platform architecture for secure digital identity, automated revenue distribution, and zero-knowledge proof use cases.

Vice Head of Data Science and AI *GDG On Campus BU (Student Activity)*

Oct 2024 – Apr 2025

- Led the Data Science and AI team, mentoring members on AI and machine learning projects while organizing technical workshops.
- Facilitated over 200 hands-on training sessions in data science tools and frameworks for more than 1000 members, significantly enhancing team capabilities.

Data Scientist Trainee *ShAI*

Feb 2024 – Sep 2024

- Gained hands-on experience in machine learning and data science workflows, actively utilizing data manipulation, visualization, and ML techniques via Python libraries.
- Developed foundational professional skills in project management, data storytelling, and time management.

Data Scientist *NTI (Training)*

Jul 2024 – Aug 2024

- Actively utilized various ML algorithms, data preprocessing, and model evaluation techniques.
- Gained technical proficiency in production machine learning tools and libraries for real-world data analysis.

Data Scientist *ZeNN*

Mar 2024 – Jul 2024

- Cleaned, analyzed, and visualized complex datasets using Python and data analysis tools to derive actionable insights.
- Developed time series models to enhance forecasting accuracy and support strategic business decision-making.
- Collaborated closely with cross-functional teams to identify unique business needs and create data-driven solutions.

Data Analyst Intern *Enakl (Internship)*

Jan 2024 – Mar 2024

- Cleaned, analyzed, and visualized data using Python, SQL, Looker Studio, and Google Colab environments.
- Conducted end-to-end data quality assessments and implemented structural data cleaning procedures.
- Created comprehensive analysis reports to present critical insights and support active business initiatives.

Skills

Programming Languages: Python, R, SQL, C++, Java

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, SciPy, Power BI, Tableau, Excel, Seaborn, Plotly

Machine Learning & Deep Learning: Scikit-learn, TensorFlow, Keras, PyTorch, Azure Machine Learning

Other Technical Skills: Data Wrangling, OOP, Data Structures, Algorithms, RESTful APIs, Git, GitHub, Docker, Microsoft Azure, Linux

Soft Skills: Teamwork, Collaboration, Effective Communication, Problem-Solving, Analytical Thinking

Projects

Facial Age Transformation: Developed a CycleGAN-based deep learning model for facial age transformation, enabling realistic aging effects for identity verification and digital forensics applications.

Real-time Sign Language Recognition: Implemented a real-time sign language recognition application leveraging MediaPipe for robust hand tracking and TensorFlow for gesture classification, enhancing accessibility and communication for the hearing-impaired.

Image Captioning System: Constructed an image captioning system by integrating DenseNet201 for feature extraction and an LSTM network for sequence generation, improving image understanding and accessibility for visually impaired users.

Fake News Detection: Developed and deployed RNN and LSTM models for identifying and classifying fake news articles, contributing to improved information literacy and mitigating the spread of misinformation.

Courses & Certifications

- Microsoft Certified: Azure Data Scientist Associate [🔗](#)
- Machine Learning Specialization (Andrew Ng) - Coursera [🔗](#)
- Google Data Analytics Professional Certificate [🔗](#)
- IBM Data Analyst Professional Certificate [🔗](#)
- Data Analyst in Power BI - Datacamp [🔗](#)
- Data Analyst in SQL - Datacamp [🔗](#)
- Data Analyst with Python - Datacamp [🔗](#)
- Supervised Machine Learning - Coursera [🔗](#)

Languages

Arabic: Native **English:** Fluent **German:** A1
